IVES COBB WRITES FROM RAWHIDE

Thinks Camp Will Have Populatoin of Ten Thousand in Thirty Days.

PLEASED WITH M'CLOUD HILL

Happy Hooligan Lease One of Best in Camp-Boom Prices Prevail.

Ives E. Cobb is one of the Salt Lakers now in the new Rawhide, Navada, district and according to a letter received today by R. K. Cobb & Co, he has formed a very good opinion of that region which is attracting not a little attention at the present time. He declares that he has never witnessed such a boom anywhere; that the camp contains a population at the present time of about 7,000 persons and ventures the prediction that within 30 days it will have 10,000.

Mr. Cobb says it is the opinion of conservative mining men that McCloud hill will be found to contain the richest mines, although the principal development so far has been done on Calloon and Grutt hills: vet it seems to be generally conceded that all three to be generally conceded that all three hills will come to the front with some good producers. Some days ago, Mr. Cobb visited the Happy Hooligan claim, located on McCloud hill where he found over 20 leasers working. The Happy Hooligan No. 1 lease adjoins the famous Miller lease and the men working there are driving to catch the main ledge, which should be encountered within 20 feet. The Ammond lease on the same claim has the ledge exposed and high grade gold ore is being taken out for shipment. "Boom prices," Mr. Cobb adds, "prevail everywhere. It costs \$3 a night for a bed and a person has to be satisfied with just what he can get; meals cost from 50 cents up and rents, as he expressed it, are simply fierce. The worst kind of an old lumber shack rents for \$250 a month and some owners of lots are asking as high as \$151 a month for ground space. Many mining men believe the district will eventually develop into an immense milling camp; while, of course, shoots of extremely high shipping ore will be found." hills will come to the front with sor

Mr. Cobb while stating that he is endeavoring to get hold of some ground in the camp, does not indicate in which portion of the district it is lo-

Ninety Miles of Construction Would Link Two of Nevada's Biggest Camps.

ORES NEEDED AT SMELTERS.

New Line Would Cause Development Of Many New

A railroad from Pioche to Ely is one of the possibilities of the near future, It is said that the Guggenheim and Gidoux smelters, which will soon be ready for operation in the eastern Nevada copper camp, will want just such ore as the mines of the Ploche district are producing.

Camps.

With the possible exception of the Prince Consolidated and Day mines practically all the ores produced in Pioche are of a silicious character, and that is just what the Ely smelters will need. On the other hand, the Prince Consolidated and Day properties contain large bodies of base ores which are acceptable at almost any smelting works. The Prince Consolidated, it was stated today by a mining man in position to know, could easily furnish 500 tons a day.

The distance from Pioche to Ely is about 85 or 90 miles. The cost of construction would be small per mile for the reason that the line would follow a valley practically all the way and encounter no difficult grades.

There is no doubt but that the Guggenheims propose to make Ely a great smelting center, and to round out the proposition as it should be, the camp will need direct rail connection with both Pioche and Goldfield. Ely will then become a railroad center surpassed by no other point in Nevada and made accessable from every other mining camp of any importance in the entire state. practically all the ores produced in

The White Pine News in pointing out

The White Pine News in pointing out the advantages to be derived by a railroad between the historic camp of Lincoln county and Ely, says:

"Connection with the Pioche district would open a large stretch of mineral country to this camp, in relation to which it would stand with the direct railroad communication in the same position as a trade and supply center as Sait Lake City now does.

"Aside from commercial advantages which would be gained, heavy ore slipments could be looked for from many camps along the line to Pioche. These might readily in time reach as large volume, if not larger, than ore shipments which a line to Tonopah and Goldfield would unquestionably have to handle.

"Pleable over are of character which

Goldreid would unquestionably have to handle.

"Ploche ores are of character which make them desirable for smelling purposes in this district. A heavy tonnage has been developed in past years, but transportation, charges until the advent of the Salt Lake railroad with a branch into the camp last fall were of necessity so high as to prohibit shipping to smelter at Salt Lake of other than the very richest of the ores. Since the railroad has been in there has been no demand on the part of Salt Lake valley smelters for ore and as a consequence the Ploche district has benefited but little as yet from the branch line. Extension of the branch line. Extension of the branch into this city would make a much shorter haul to smelter and consequently a lower rate.

"Recently diamond drill exploitation in Pioche district has given occasion for belief that its values go down and that at depth big ore bodies will be opened which will change the entire aspect of the district and make it one of large production and high attractiveness. Whether results are obtained at depth or not, however, Pioche camp is developed far beyond the prospect stage and is possessed of some excellent properties. With connection with reduction works such as extension of the Clark road branch from its present terminus to the smelter at McGill would give, the camp would make great strides and resultant large benefits would be felt here in every line of trade and industry. Construction of the line would be comparatively easy and inexpensive. Aside from the new producing country which it would make "Recently diamond drill exploitation

and inexpensive. Aside from the new producing country which it would make dependent on this district as a supply center, the new line would also enable a quick outlet for the camp to the south, east and west.

"The news of the possibility of this railroad construction has made for a good deal of elation on inside circles in the city, where it is fully realized that results attendant would be of enormous value in hastening the day enormous value in hastening the day which will ultimately see the district the greatest mining, smelting and rail-roed center in the west. Ploche will also doubtless find the news much to give occasion for good feeling."

BACK FROM THE PARK.

General Manager Lambourne of Daly Judge Installs New Official.

General Manager George W. Lambourne of the Daly Judge Mining company returned from a two days' trip to Park City last night during which time the new general superintendent, Mr. E. W. Durfee, was duly installed. The retiring superintendent, Frederick W. Burrall, will remain in the Park several days longer or until his suseveral d several days longer, or until his sus-cessor thoroughly familiarizes himself with the properties, when he will take his departure for Boston and thence to Norway to take charge of the Arctic

Norway to take charge of the Arctic Conl company's mines.

Although Mr. Lambourne had nothing of particular importance to impart relative to the operation of the Daly Judge properties, he stated that the new zinc plant being installed by the Grassalli Chemical company, will probably be ready for a trying out within the next 10 days on the zinc middlings. ably be ready for a trying out within the next 10 days on the zinc middlings from the Judge mill. It will be remem-bered that Mr. Lambourne referred to the Grassalli company in his last an-nual report, wherein he stated that the latter had contracted to supply a mar-ket for the zinc ores of the Daly Judge mine and had already advance \$5,000 on its contract. Mr. Lambourne serve on its contract, Mr. Lambourne says

the zinc plant has been built with the view to handling the product economi-cally. Automatic devices have been in-stalled which should cut the costs down

stailed which should cut the costs down to a minimum.

There is much rejoicing in Park City over the progress being made with the draining of the camp again through the restoration of the Ontario tunnel. The water has fallen below the 1,200-foot level, showing that since the holes were punched through from the parallel drift it has receded more than 100 feet, leaving less than 300 feet for the water to lower to reach the level of the main tunnel. It is figured by officials of the company that in 60 days from now the avenue will have been opened after being closed a little more than three years.

METALLURGY TO LUMBER.

H. L. Charles Former Manager of the Bingham Con. Into New Enterprise.

H. L. Charles, formerly manager of the Bingham Consolidated Mining & Smelting company and who retired from the service of that corporation on the first of the year when the smelter at Bingham Junction was closed, has arrived from a trip to Canada where he is interested in a large lumbering enterprise

where he is interested in a large lumbering enterprise.

About four years ago, Mr. Charles and three associates acquired something like 10,000 acres of timber and mineral lands in northern Idaho and Canada which formed the basis for the organization of a company. Two sawmills are now in operation, with the third under construction. Mr. Charles has been elected president and manager of the company and will make his headquarters at Lethbridge, Alberta. He expects however, to claim Salt Lake as his home, his family having become comfortably located here.

Mr. Charles speaks enthusiastically of the Alberta country and says it is a region that is bound to develop very rapidly during the next few years.

RETURN OF RYAN.

Considerable Significance Attached to His Early Appearance in Butte-(Pollock Special Wige.)

(Pollock Special Wige.)

Butte, Feb. 28.—John D. Ryan, president of the Anaconda Copper company and managing director of Amalgamated, is now on his way from New York and expected to arrive in Butte the latter part of this week or early next week. His return after an absence of several months is looked upon by well-informed interests as very significant. There have been humors for several days of a possible resumption of mining operations at the Anaconda mine and probably at the North Butte and Butte Coalition mines, and it would not be surprising if Mr. Ryan should come armed with authority to begin operations not only at the mines, but also of the opening of Washoe smelter.

INDEX TO BUSINESS.

(Pollock Special Wire.) (Pollock Special Wire.)

Bosten, Feb. 28.—Daniel Guggenheim is quoted in the News Bureau as saying that the metal business as a whole has suffered more severely than was to have been expected. Copper, in his judgment, has taken the place formerly held by steel and iron as the index of business conditions. He looks for large improvements by summer time, and steady betterments throughout the year.

COPPER EXPORTS.

(Pollock Special Wire.) New York, Feb. 28.—Exports of copper for the week ending Feb. 27 6,387 tons; thus far this month, 21,586; since Jan. 1, 54,730 tons.

REPORT NOW DENIED.

(Pollock Special Wire.) Boston, Feb. 28.—A Butte dispatch says: The report that Senator Clark has sold out his mining interests in Montana. to the Amalgamated company is absolutely without foundation, American Car & Foundry 27% American Locomotive (bid) 32%

BACK FROM NEVADA

J. A. Foley, commercial agent of the Illinois Central railroad, has re-turned from a trip to the Gold Circle district in Nevada where he is inter-ested with a syndicate of Sait Lake mining men in an attractive group of claims. The district is situated in Elko county about 50 miles north from Gol. county, about 50 miles north from Gol-conda. The region is attracting con-siderable attention and over 20 leasers are at work at the present time.

FOOT BADLY CRUSHED.

(Special to the "News,") Ogden, Feb. 28.—David Nelson, an employe in the local railroad yards. had his foot badly crushed last even-ing. He was taken to the hospital for treatment,

STOCKS CLIMB UP **DEMANDS GO DOWN**

Opening With Cheerful Tone, Takes a Slump With Prices Shaded.

New York, Feb. 28.-Opening prices of stocks today showed insignificant changes from last night, but these were mostly gains. A rise of a point in American Smelting was a feature of

American Smelting was a feature of the market.

Trading took on a more cheerful appearance, the market broadening out with rising prices in all directions. The usual prominent stocks gained most.

The demand for stocks died down and prices were shaded. Rock Island preferred and American Smelting preferred rose 1, People's Gas 1¼ and American Sugar 1½. Baltimore & Ohio preferred declined 1.

Bonds were steady.

The market closed heavy and heavy dull. Prices hardened late in the session in sympathy with a rise of 3½ in National Lead. Western Union gained 3. National Railroad of Mexico preferred 2½, Utah Copper and Federal Sugar preferred 2, American Woolen preferred 1½ and Northwestern, Missouri Pacific and Central Leather preferred 1. These advances were not all held.

PRODUCE.

Chicago, Feb. 29.—The wheat market today opened strong because of an advance of more than 2d at Liverpool. The continental markets were also strong. Northwestern receipts continued light. May wheat opened 1.18 to 1.18% higher at 98½ to 99, sold at 99¼, and then dropped back to 98½. Corn opened firm with wheat, but soon broke on realizing sales. May corn opened unchanged to ½ higher at 61% to 62½, sold at 62¼, and then declined to 61½ @62%.

to 61½ 662½. The oats market was easy, being influenced chiefly by corn. May oats opened unchanged to ½ lower at 53½ to 53¾ and sold at 53¼.

Provisions were firm because of higher prices for live hogs. May pork opened 10 cents higher at 11.65; lard was up 7½ at 7.62½, and ribs were 5@7½c. higher at 6.62½ to 6.65.

Realizing sales in the last half of the session caused a decline, May wheat selling off to 97½@97¾. The close was steady with May ¾@½ lower at 97¾@98.

Corn-Prices eased off along with wheat, May declining to 61%. The close was easy with May ½ lower at 61%.
Close: Wheat—May 87%@98; July 2%; Sept. 89%. Corn-May 61%; July 59%@1/2; Sept.

58% 058%.
Oats-May old 53; May 524@53%;
July old 44%; July 43%; Sept. 37%.
Pork-May 11.57%; July 11.95.
Lard-May 7.55; July 7.75; Sept. 7.97%.
Ribs-May 6.55; July 6.85; Sejt. 7.10.

Rye—Cash, 84. Barley—Cash 75@90. Timothy—March 4.85. Clover—March 19.20, SUGAR AND COFFEE. New York, Feb. 28.—Sugar, raw, strong. Fair refining, 3.33@3.36; cen-trifugal, .96 test, 3.83@3.86; molasses sugar, 3.08@3.11. Refined-Steady, Crushed, 5.60; pow-

dered, 5.00; granulated, 4.90. Coffee—Quiet, No. 7 Rio, 6¼; No. 4, Santos, 83-5@8½. BUTTER AND EGGS. Chlcago, Feb. 28.—Butter, steady. Creams, 21@32; dairies, 20@28. Eggs-Easy, 191/2 @ 20.

Liverpool, Feb. 28.—Close: Wheat, March, 7s, 1%d; May, 7s. 2%d; July, 7s.
